-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Claims 4-8, 11-13, 22, 24 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only. See MPEP § 608.01(n). Accordingly, these claims have not been further treated on the merits.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 9-10, 14-21, 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Hasegawa (EP 1130415) or Lau et al (Pat. No. 6,122,506).

Hasegawa teaches a method for determining the position of a device and a GPS device including a first circuit arranged to receive at least one first signal and arranged to output first timing information dependent on the first signal; a second circuit arranged to receive at least one second signal and arranged to output second timing information dependent on the second signal; and a third circuit arranged to determine timing information of the device, the third circuit arranged to receive at least one of the first and second timing information, and further arranged to produce a third timing information dependent on at least one of the received first and second signals, wherein the third circuit is further arranged to produce a location estimate dependent on the first and third timing information; and wherein the third timing information is initially synchronised to the first timing information and maintained substantially synchronised to at least one first

signal using the second timing information. See abstract; fig. 8; paragraphs 0012-0023, 0026-0038, and 0047-0050.

Lau et al teach a method for determining the position of a device and a GPS device including a first circuit arranged to receive at least one first signal and arranged to output first timing information dependent on the first signal; a second circuit arranged to receive at least one second signal and arranged to output second timing information dependent on the second signal; and a third circuit arranged to determine timing information of the device, the third circuit arranged to receive at least one of the first and second timing information, and further arranged to produce a third timing information dependent on at least one of the received first and second signals, wherein the third circuit is further arranged to produce a location estimate dependent on the first and third timing information; and wherein the third timing information is initially synchronised to the first timing information and maintained substantially synchronised to at least one first signal using the second timing information. See abstract; fig. 2; col 2, lines 20-35; col 3, lines 48-62; col 7, lines 39-57.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dao L. Phan whose telephone number is (571)272-6976. The examiner can normally be reached on M-F 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Tarcza can be reached on (571)272-6979. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
